INSIGHTS

- Male players make purchases more than female players.
- Racing games had highest in app purchase revenue ,and action RPG games had least revenue.
- Spending more time in games does not necessarily mean higher spending.
- The average first purchase occur 15 days after installation.

RECOMMENDATIONS

- Should find the strategies in racing games and implement it in other genres.
- Should give promotional offers before day 15 to increase chances of early purchases.
- Should find factors beyond session length that affects chance of purchase.
- Find why female players purchase less.
